

Product Name :
M.I.G. 400 Inventor Type Welding Machine

Product Code :
HANDM000A450009

Description :

M.I.G. 400 Inventor Type Welding Machine

Technical Specification :

Phase	Three Phase
Output Current	60-400 A
Frequency	50/60 Hz
Rated Input Power Capacity	11 KVA
Duty Cycle	60 %
Insulation Class	F
Efficiency	85
Quality	370 Pieces (20ft)
Protection Class	IP21
Input Voltage	400 V
Diameter of wire	0.6/0.8/1.0/1.2 mm
Type of wire Feeder	Outside
Gross Weight	25 kg
Overall Dimension	58.8 x 31 x 41.5 cm

Features:

- Suitable for sheet over 0.8 M.M.
- Cost saving and efficiency improving.
- With separated wire feeder, easy and considerable for operation.
- High Welding speed, high arcing success rate.

- Continuous and discontinuous welding function.
- Automatic voltage pulsation compensation capacity.
- Suitable for carbon steel, alloy steel, soft steel etc. and various wire.
- Little spatter, uniform welding pool, good welding shape.
