

Product Name :
Sledge Hammer Long Handle Grip with Fibreglass Rubber Shaft

Product Code :
HAND-HAM52004

Description :

Sledge Hammer Long Handle Grip with Fibreglass Rubber Shaft

Technical Specification :

Professional long handle grip with fibreglass rubber shaft sledge hammer for home, construction and demolition work. The striking surface on the octagonal hammer is precision ground and heat treated. The bottom of the handle is coated with rubber, so the impact of the hand and arm is small.

Comfortable grip: The ergonomic non-slip handle of the fiberglass hammer avoids any slipping and provides a comfortable grip.

Steel head: The club hammer head with fiberglass handle is heat-treated and forged from fine-grained high-quality steel.

Designed with first-class materials and tested for best performance, our tools will surely make field work convenient, smooth and fast.

Vibration absorption: Sledge hammer's glass fiber components can absorb vibration and minimize vibration.
